

Do you feel in control of your retirement?

Not saving fast enough?

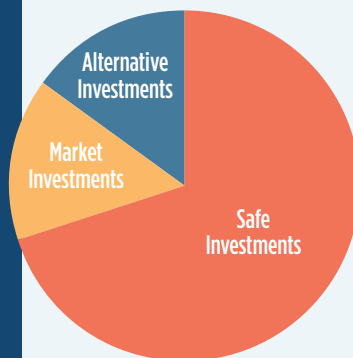

Wish you could avoid market volatility?

IRA dilemma...high fees and choices limited to the stock market

Putting all your IRA savings in the stock market does not offer the diversification and protection you need to preserve your wealth against market volatility. Couple that with high management fees, inflation, and taxes and you'll be on the hamster wheel well beyond your imagination.

It's your money. Take control.

Wealth CAP's self-directed option gives you the freedom to choose from traditional investments (e.g. stocks, bonds, mutual funds), safe investments (e.g. cash value life, fixed annuities, fixed index annuities, and CDs), and alternative investments (e.g. real estate, oil/gas, precious metals). Many alternative investments offer lucrative, predictable, and contractual returns.

True Diversification. Gains, liquidity, and protection.

Diversify your assets into a bucketing system where each bucket is protected from each other while also diversified by asset classes internally.

Free financial wellness education and comprehensive roadmap.

Become an expert on your future.

Prepare yourself for life's challenges, such as budgeting, saving for a house, or paying off debt with Wealth CAP's on-demand financial wellness education. Additionally, the comprehensive retirement roadmap gives you a 360° view of finances, social security, student loans, debt reduction, taxes, Medicare, education, estate, relocation, and budgeting. More importantly, you get a retirement blueprint that defines your retirement journey.
